GOdrill – the first microdrill from Kennametal

- General purpose SC drill for a wide range of materials. Marginless design for reduced friction and heat – thus longer tool life.
- Optimized gashing design for microdrilling ensures free flow of chips in the center of the drill.
- Uninterrupted straight cutting lip allows no starting point for wear and enables even distribution of cutting forces for longer tool life in all materials and less chipping on cutting edge.
- KC7325™ grade contains a double coating for broad-band applications, and a TiN top layer serves as a wear indicator for easier monitoring of small drills, which can be difficult to see
